

Amidst the methamphetamine crisis in Los Angeles County, the Los Angeles County Department of Public Health (LAC DPH) - Substance Abuse Prevention and Control (SAPC), in partnership with Fraser Communications, is creating a campaign to address methamphetamine use in LA County.

As a part of this media campaign, Fraser Communications will conduct in-depth interviews (either in-person or by phone) with active users and those in long-term recovery. The focus group conveners will assist with transportation and incentives will be available to those who participate. As experts in your field, we are reaching out to gain assistance with the outreach and recruitment of participants.

Please contact JMonji@ph.lacounty.gov if you have anyone who may be interested.
