

The UCLA Jonathan and Karin Fielding School of Public Health is pleased to host The Health Forum at UCLA (FSPH), a series of regularly scheduled free public programs featuring health leaders discussing critical issues in public health.

"Narrow Networks: Changes, Issues, and What They Mean for Patients, Providers, and Health Plans"

Narrow networks, also referred to as select or targeted networks, have become part of our health care delivery system after implementation of the Affordable Care Act. These provider networks were developed in response to rising costs and the imperative of health plans to provide their Commercial and Health Benefit Exchange members a less costly choice of hospitals, physicians, and ancillary services. In this Health Forum, our panel will discuss whether the number of physicians and hospitals included is adequate, if quality is being maintained, and what the reaction to these networks has been among state regulators, private advocates, and patients.

When: Wednesday, January 28, 6:00-8:00pm PST
6:00-6:30pm: Coffee and Reception
6:30-7:15pm: Panel Presentations
7:15-8:00pm: Question and Answer Session

Where: Neuroscience Research Building Auditorium, UCLA
635 Charles E. Young Drive South, Los Angeles
